Drawings

1. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on 9/30/02 have been approved. A proper drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The correction to the drawings will not be held in abeyance.

Specification

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the securing element being connected to the grip proximate the rearward end of the grip and the hand grip being connected to the securing element forward of the securing element.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 8 recites the limitation "said barrel" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3641

6. Claims 8, 9, 12 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Tellie (US Patent # 3,939,589). Tellie discloses a forearm (reference 2) for a gun comprising a grip (reference 2a) having a forward end and a rearward end (Figure 1), and a hood (handle assembly) (reference 2b), removably secured to the forearm, having a securing element (references 18, 19 and 20) and a handgrip (reference 21) being located about and above the barrel (Figure 2), the securing element being connected to the grip proximate the rearward end of the grip (Figure 2) and the handgrip being connected the securing element forward of the securing element. Wherein the handle assembly comprises a securing element (reference 19) and a hand grip connected thereto by a neck element (reference 20 and 21b) and the securing element is substantially U-shaped (Figure 1).

Allowable Subject Matter

7. Claims 1-7 are allowed.

8. Claims 10 and 11 would possibly be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 3641

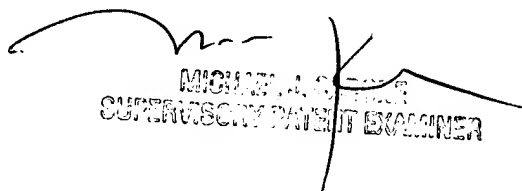

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
